

## Instructions

1. For each question make a separate folder and put the question number as the name of the folder. All answers to a question should be put in its respective folder.
2. The screenshots of the solutions should be uploaded for the questions that need to be solved out on paper. For the programming questions you may simply include the code file.
3. If a particular programming question makes use of some library please provide instructions on how to install the same in a ReadMe file in the folder of the same question (No need to do this for common use libraries like NumPy, matplotlib etc.).
4. Send your solutions to [stac@students.iitmandi.ac.in](mailto:stac@students.iitmandi.ac.in) in a zip file named after your team name.
5. If you have any doubts regarding any question you may ask them in the **Electra channel under the Pleiades category on our discord server**. The link to the discord server is: <https://discord.gg/2FWQf8dUuk>
6. **Hints will be released on the discord channel mentioned in point 5. So, make sure you stay active there.**
